Terms and Conditions Of Sale — Parts 31

Specification and part number are subject to change without notice.

www.multioui

Ordering parts has never been easier! Choose from three easy options:

Effective: January 1st, 2006

Best Deal! Order via Internet (Dealers Only):

Order parts on-line using Multiquip's SmartEquip website!

- View Parts Diagrams
- Order Parts
- Print Specification Information

If you have an MQ Account, to obtain a Username and Password, E-mail us at: parts@multiquip.com.

To obtain an MQ Account, contact your District Sales Manager for more information.

Goto www.multiquip.com and click on Order Parts to log in and save!

Use the *internet* and qualify for a **5% Discount** on *Standard orders* for all orders which include complete part numbers.*

Note: Discounts Are Subject To Change

Order via Fax (Dealers Only):

All customers are welcome to order parts via Fax. **Domestic (US) Customers dial:**

1-800-6-PARTS-7 (800-672-7877)

Fax your order in and qualify for a 2% Discount on Standard orders for all orders which include complete part numbers.*

Note: Discounts Are Subject To Change

Order via Phone:

Domestic (US) Dealers Call:

1-800-427-1244

Non-Dealer Customers:

Contact your local Multiquip Dealer for parts or call 800-427-1244 for help in locating a dealer near you.

International Customers should contact their local Multiquip Representatives for Parts Ordering information.

When ordering parts, please supply:

- Dealer Account Number
- Dealer Name and Address
- ☐ Shipping Address (if different than billing address)
- ☐ Return Fax Number
- Applicable Model Number
- Quantity, Part Number and Description of Each Part
- **Specify Preferred Method of Shipment:**
 - ✓ UPS/Fed Ex
- ✓ DHL ✓ Truck
- Priority OneGround
- Ground ■ Next Day
- Second/Third Day

NOTE

All orders are treated as *Standard Orders* and will ship the same day if received prior to 3PM PST.

WE ACCEPT ALL MAJOR CREDIT CARDS!

FOR YOUR SAFETY AND SAFETY OF OTHERS!

Safety precautions should be followed at all times when operating this equipment. Failure to read and understand the Safety Messages and Operating Instructions could result in injury to yourself and others.

This manual has been developed to provide complete instructions for the safe and efficient operation of this equipment.

Before using this equipment ensure that the operating individual has read and understood all instructions in this manual

SAFETY MESSAGE ALERT SYMBOLS

The three Safety Messages shown below will inform you about potential hazards that could injure you or others. The Safety Messages specifically address the level of exposure to the operator, and are preceded by one of three words: DANGER, WARNING, or CAUTION.

DANGER

You WILL be KILLED or SERIOUSLY INJURED if you DO NOT follow these directions.

WARNING

You **CAN** be **KILLED** or **SERIOUSLY INJURED** if you **DO NOT** follow these directions.

CAUTION

You **CAN** be *INJURED* if you **DO NOT** follow these directions.

HAZARD SYMBOLS

Potential hazards associated with the operation of this equipment will be referenced with Hazard Symbols which appear throughout this manual, and will be referenced in conjunction with Safety Message Alert Symbols.

WARNING — Respiratory Hazards

ALWAYS wear approved respiratory protection when required.

A CAUTION — Rotating Parts Hazards

NEVER operate equipment with covers or guards removed. Keep fingers, hands, hair and clothing away from all moving parts to prevent injury.

▲ CAUTION — Accidental Starting Hazards

OFF ALWAYS place the equipment ON/OFF switch in the OFF position when the equipment is not in use.

▲ CAUTION — Eye and Hearing Hazards

ALWAYS wear approved eye and hearing protection.

▲ CAUTION — Equipment Damage Hazards

Other important messages are provided throughout this manual to help prevent damage to your equipment, other property, or the surrounding environment.

RULES AND REGULATIONS

WARNING — Read This Manual

Failure to follow instructions in this manual may lead to serious injury or even **DEATH!** This equipment is to be operated by trained and qualified personnel only! This equipment is for industrial use only.

GENERAL SAFETY

■ **DO NOT** operate or service this equipment before reading this entire manual.

- This equipment should not be operated by persons under 18 years of age.
- **NEVER** operate this equipment without proper protective clothing, shatterproof glasses, steel-toed boots and other protective devices required by the job.

■ **NEVER** operate this equipment when not feeling well due to fatigue, illness or when under medication.

■ **NEVER** operate this equipment under the influence of drugs or alcohol.

- NEVER use accessories or attachments that are not recommended by Multiquip for this equipment. Damage to the equipment and/or injury to user may result.
- Manufacturer does not assume responsibility for any accident due to equipment modifications. Unauthorized equipment modification will void all warranties.
- Whenever necessary, replace nameplate, operation and safety decals when they become difficult to read.
- ALWAYS check the equipment for loosened threads or bolts before starting.
- MAINTAIN equipment is a safe operating condition at all times.
- KEEP bystanders, children, and visitors away while operating the equipment. Distractions can cause loss of control.

- DO NOT wear loose clothing or jewelry. Contain long hair. Keep hair, clothing, and gloves away from moving parts. Rotating parts can cause injury if contacted.
- ALWAYS keep work area clean and free of foreign matter and debris. Also keep work area well lit.
- **NEVER** operate the equipment in an explosive atmosphere or near combustible materials. An explosion or fire could result causing severe bodily harm or even death.

- DO NOT overreach. Keep proper footing and balance at all times.
- **NEVER** leave the equipment unattended. When not is use, before servicing, and when changing accessories, always unplug the equipment from the power source.
- **USE** this equipment for its intended purpose only.
- **KEEP** equipment clean for better and safer performance. Keep handles dry, clean, and free from oil and grease.
- INSPECT the equipment after each use. Replace any damaged or worn parts immediately. Do not use equipment if defective.
- If a malfunction occurs, immediately unplug the equipment from the power source and correct the problem. If problem cannot be corrected, contact the nearest MQ service center.
- ALWAYS store the equipment in a clean, dry location out of the reach of children.

EMERGENCIES

■ ALWAYS know the location of the nearest fire extinguisher.

■ ALWAYS know the location of the nearest first aid kit.

■ In emergencies, *always* know the location of the nearest phone or keep a phone on the job site. Also know the phone numbers of the nearest ambulance, doctor and fire department. This information will be invaluable in case of emergency.

RULES AND REGULATIONS

ELECTRICAL SAFETY

- ALWAYS test the *POWER* switch on the equipment before operating. The purpose of this switch is to shut down the power.
- **NEVER** use a extension cord that is frayed or damaged where the insulation has been cut.
- **NEVER** carry the equipment by its power cord or disconnect it by yanking the cord from the power outlet.
- ALWAYS make certain that the proper extension cord has been selected for the job. See Extension Cord Gauge Selection Table.
- **NEVER** allow power cord to *lay in wate*r.
- **NEVER** *stand in water* while operating the equipment.
- When connecting the unit to a power receptacle, make sure the receptacle circuit is connected to either a GFCI receptacle or a receptacle protected by a 20 amp circuit breaker.
- When plugging the unit into a power receptacle, check the nameplate for the correct operating voltage. Operating the rebar bender at the wrong voltage will damage the electrical components. ALWAYS read the nameplate before applying power.

- This unit is equipped with a 3-prong male power plug. **DO NOT** use a 2-prong adapter when plugging into a wall outlet. This will defeat the purpose of the ground circuit. If the plug does not fit into the receptacle, contact a qualified electrician to install a 3-conductor wall receptacle (outlet).
- Avoid body contact with grounded surfaces such as pipes, radiators, ranges and refrigerators. There is an increased risk of electrical shock if your body is grounded.
- **DO NOT** expose the hydraulic power unit to rain or wet conditions. Water entering the power unit will increase the risk of electrical shock.
- When operating the unit outdoors, be sure to use the appropriate outdoor extension cord. This type of extension cord reduces the risk of electrical shock.
- ALWAYS remove the AC power cord from the power source before performing any service or maintenance on the unit. This preventative safety measure reduces the possibility of accidental starting.
- When operating near an arc welder, it is important the both the unit and the welding equipment be connected to the same earth ground. If they are not, server damage to the unit, particularly to the power cord could occur. Personal injury may also occur.

NOTE: Roller No. 625 and Collar No. 625 are factory installed on the bender.

GENERAL INFORMATION

GENERAL INFORMATION

The *MQ MB25A Rebar Bender* is designed to be used as a portable on-site rebar bender, capable of bending inplace rebar to approved American Concrete Institute (ACI) radius. Labor time and injuries are greatly reduced from manually bending rebar. The MB25A is capable of bends up to 180°.

The MB25A comes with 5 rollers and collars which can be used in different combinations to match the diameter of the rebar to be bent.

The MB25A comes with a foot switch which can start the bending procedure with a push of the pedal instead of pressing the start button.

An emergency button is available to immediately stop the machine when something goes wrong during bending. The roller then returns to the starting position.

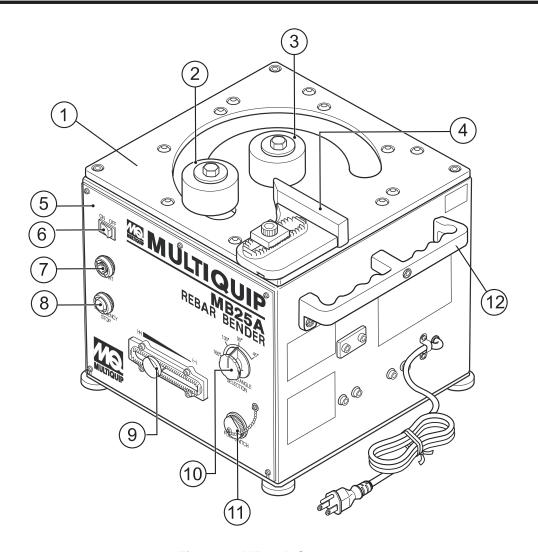

Figure 1. MB25A Components

Figure 1 shows the components of the MB25A Rebar Bender. These components are described below.

- 1. **Table** Holds the roller, collar, stopper and the rebar to be bended.
- 2. **Roller** Works in combination with the collar depending on the diameter of the rebar to bend.
- 3. **Collar** -Works in combination with the roller depending on the diameter of the rebar to bend.
- 4. **Stopper** Holds the rebar in place when bending.
- Panel A Holds the different controls for the rebar bender.
- 6. **Power Switch** Turns the power of the rebar bender on or off.

- 7. **Start Switch** Starts the bending process.
- 8. **Emergency Stop Switch** Stops the rebar bending and moves the roller back to the starting position.
- 9. **Angle Adjusting Knob** Used to "fine tune" the angle after trial bends of a few pieces of rebar.
- Angle Select Dial Sets the angle that the rebar is going to be bent.
- 11. **Connector (for foot switch)** Connects to the foot switch to start the machine with a push of the pedal.
- 12. Handle Used to lift the rebar bender.

SELECTION AND INSTALLATION OF ROLLER AND **COLLAR**

WARNING

Keep fingers from the bending area. Moving parts can cause serious injury.

Do not drop anything into the machine from the bending area as this may damage the machine.

- 1. Select the roller and corresponding collar to match the diameter of the rebar to be bent. See Table 2 for the different combinations.
- 2. Apply multi-purpose grease to the roller.
- 3. Install the collar and the roller as shown in Figure 2.

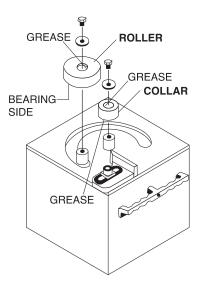

Figure 2. Roller and Collar Installation

- 4. When using a roller with a bearing, bearing must face downward.
- 5. When using a collar with a bearing, bearing must face downward.
- 6. To prevent the roller and the collar from coming off, attach the washer securely with the bolt.
- 7. Position the stopper so that rebar to be bent is parallel to the front of the stopper and tighten the rebar securely in place. If the rebar is not parallel to the front, the bending angle will be incorrect. See Figure 3.

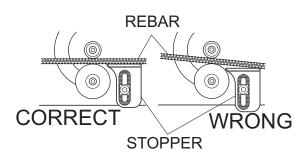

Figure 3. Stopper Position

8. Rotate the Angle Select Dial to the desired angle that the rebar is to be bent (Figure 4). If the selected angle cannot be obtained by the Angle Select Dial, "fine tune" the angle by using the Angle Adjusting Knob (Figure 5).

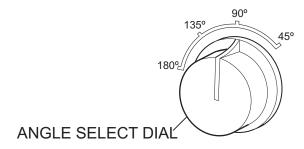

Figure 4. Selecting the Bending Angle

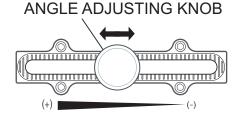

Figure 5. Fine Tuning the Bending Angle

- 9. Plug the power cord into a proper single-phase power source. Make sure that the rebar bender is properly grounded.
- 10. Turn the power switch on.
- 11. Hold the rebar firmly and press the Start Switch. This will engage the clutch and the roller to bend the rebar.
- 12. After the rebar is bent to the desired angle, the roller will automatically spring back to the starting position.

USING THE ANGLE ADJUSTING KNOB

Depending on the diameter of the rebar and its tensile strength, it may be necessary to "fine tune" the angle using the Angle Adjusting Knob after trial bends of a few pieces of rebar.

- 1. The Angle Adjusting Knob is automatically locked when released. Unlock the knob by pulling it hard and sliding the knob to the right or left to adjust the angle.
- 2. When the desired angle is selected, release the knob. The knob will now be automatically locked.

USING THE FOOT SWITCH

Instead of the Start Switch, the Foot Switch can be used to start the bending process. See Figure 6.

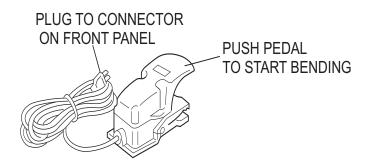

Figure 6. Starting with the Foot Switch

- 1. Insert the plug of the foot switch to the Foot Switch Connector on the front panel of the rebar bender.
- 2. Press the pedal on the foot switch to start bending.
- 3. When the bending angle is achieved, the roller will automatically spring back to the start position.

It is not necessary to press the pedal continuously while bending. Once the pedal is pressed bending will start and pedal can be released.

EMERGENCY STOP SWITCH

1. To stop the rebar bender immediately in case anything goes wrong in the bending process, press the Emergency Stop Button (Figure 7). The roller on the rebar bender will immediately stop and return to the start position.

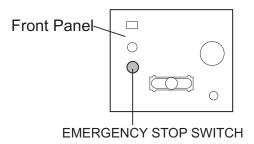

Figure 7. Emergency Stop Switch

The roller goes back to start position very quickly after bending because of the spring mechanism. Keep away from the machine until the roller is completely back in the start position to prevent any injury.

⚠ DANGER

During operation of this rebar bender, there exists the possibility of *electrocution*, *electrical shock or burn*, which can cause *severe bodily harm* or even *DEATH!*

To avoid these hazards:

NEVER use damaged or worn cables when plugging the rebar bender into an AC power receptacle.

NEVER grab or touch a live power cord with wet hands.

NEVER stand in water and touch a live power cord.

(POWER ON)

MAINTENANCE

REMOVING STEEL DEBRIS

1. To remove steel debris from the machine, tilt it and clear all debris from the outlet.

WARNING

Do not let debris or rust accumulate inside the machine as this could lead to malfunction of the machine.

REPLACING CARBON BRUSHES

WARNING

Unplug unit from power source before replacing carbon brushes.

When the carbon becomes less than 5 or 6 mm (1/4 inch) the motor force deteriorates because of low rectification (Figure 8). The carbon brushes need to be replaced.

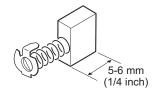

Figure 8. Carbon Brush Size

Make sure that the power plug is not connected to the power source.

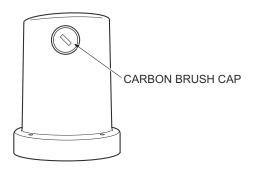

Figure 9. Replacing Carbon Brushes

- 2. Remove the rear panel and the bottom plate of the machine so that the outer frame of the motor is visible (Figure 9).
- 3. Remove the carbon brush cap of the motor outer frame using a standard screwdriver.
- 4. Replace the carbon brushes with new ones.
- 5. Put back the cap and reinstall the rear and end panels of the machine.

WARNING

Unplug unit from power source before troubleshooting.

TABLE 4. TROUBLESHOOTING				
SYMPTOM	POSSIBLE PROBLEM	SOLUTION

EXPLANATION OF CODE IN REMARKS COLUMN

The following section explains the different symbols and remarks used in the Parts section of this manual. Use the help numbers found on the back page of the manual if there are any questions.

The contents and part numbers listed in the parts section are subject to change *without notice*. Multiquip does not guarantee the availability of the parts listed.

Sample Parts List:

NO.	PART NO.	PART NAME	QTY.	REMARKS
1	12345	BOLT	1	. INCLUDES ITEMS W/*
2*		WASHER, 1/4 IN.		. NOT SOLD SEPARATELY
2*	12347	WASHER, 3/8 IN.	1	. MQ-45T ONLY
3	12348	HOSE	A/R	. MAKE LOCALLY
4	12349	BEARING	1	. S/N 2345B AND ABOVE

NO. Column

Unique Symbols - All items with same unique symbol (*, #, +, %, or >) in the number column belong to the same assembly or kit, which is indicated by a note in the "Remarks" column.

Duplicate Item Numbers - Duplicate numbers indicate multiple part numbers are in effect for the same general item, such as different size saw blade guards in use or a part that has been updated on newer versions of the same machine.

When ordering a part that has more than one item number listed, check the remarks column for help in determining the proper part to order.

PART NO. Column

Numbers Used - Part numbers can be indicated by a number, a blank entry, or TBD.

TBD (To Be Determined) is generally used to show a part that has not been assigned a formal part number at time of publication.

A blank entry generally indicates that the item is not sold separately or is not sold by Multiquip. Other entries will be clarified in the "Remarks" Column.

QTY. Column

Numbers Used - Item quantity can be indicated by a number, a blank entry, or A/R.

A/R (As Required) is generally used for hoses or other parts that are sold in bulk and cut to length.

A blank entry generally indicates that the item is not sold separately. Other entries will be clarified in the "Remarks" Column.

REMARKS Column

Some of the most common notes found in the "Remarks" Column are listed below. Other additional notes needed to describe the item can also be shown.

Assembly/Kit - All items on the parts list with the same unique symbol will be included when this item is purchased.

Indicated by:

"INCLUDES ITEMS W/(unique symbol)"

Serial Number Break - Used to list an effective serial number range where a particular part is used.

Indicated by:

"S/N XXXXX AND BELOW"

"S/N XXXX AND ABOVE"

"S/N XXXX TO S/N XXX"

Specific Model Number Use - Indicates that the part is used only with the specific model number or model number variant listed. It can also be used to show a part is NOT used on a specific model or model number variant.

Indicated by:

"XXXXX ONLY"

"NOT USED ON XXXX"

"Make/Obtain Locally" - Indicates that the part can be purchased at any hardware shop or made out of available items. Examples include battery cables, shims, and certain washers and nuts.

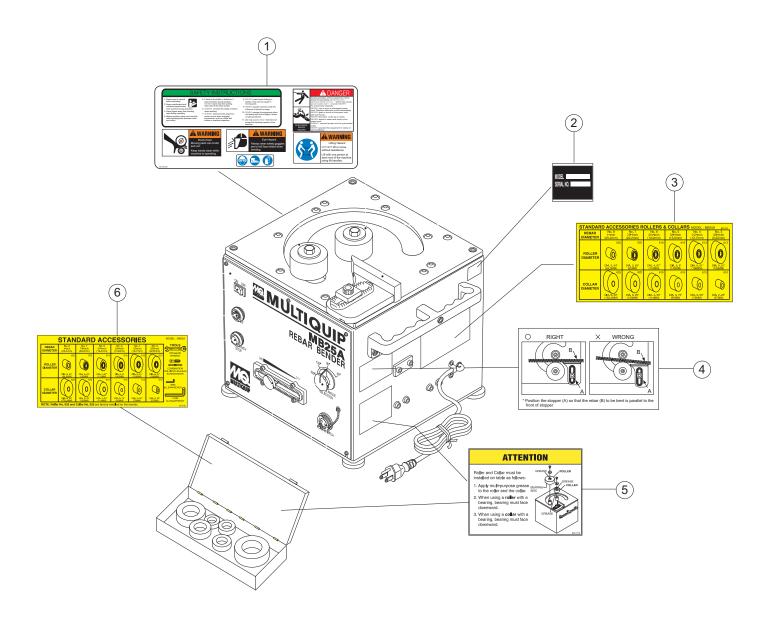

"Not Sold Separately" - Indicates that an item cannot be purchased as a separate item and is either part of an assembly/kit that can be purchased, or is not available for sale through Multiquip.

TERMS AND CONDITIONS OF SALE — PARTS

PAYMENT TERMS

Terms of payment for parts are net 30 days.

FREIGHT POLICY

All parts orders will be shipped collect or prepaid with the charges added to the invoice. All shipments are F.O.B. point of origin. Multiquip's responsibility ceases when a signed manifest has been obtained from the carrier, and any claim for shortage or damage must be settled between the consignee and the carrier.

MINIMUM ORDER

The minimum charge for orders from Multiquip is \$15.00 net. Customers will be asked for instructions regarding handling of orders not meeting this requirement.

RETURNED GOODS POLICY

Return shipments will be accepted and credit will be allowed, subject to the following provisions:

- A Returned Material Authorization must be approved by Multiquip prior to shipment
- To obtain a Return Material Authorization, a list must be provided to Multiquip Parts Sales that defines item numbers, quantities, and descriptions of the items to be returned.
 - The parts numbers and descriptions must match the current parts price list.
 - The list must be typed or computer generated.
 - c. The list must state the reason(s) for the return.
 - d. The list must reference the sales order(s) or invoice(s) under which the items were originally purchased.
 - e. The list must include the name and phone number of the person requesting the RMA.
- A copy of the Return Material Authorization must accompany the return shipment.
- Freight is at the sender's expense. All parts must be returned freight prepaid to Multiquip's designated receiving point.

- 5. Parts must be in new and resalable condition, in the original Multiquip package (if any), and with Multiquip part numbers clearly marked.
- 6. The following items are not returnable:
 - a. Obsolete parts. (If an item is in the price book and shows as being replaced by another item, it is obsolete.)
 - Any parts with a limited shelf life (such as gaskets, seals, "O" rings, and other rubber parts) that were purchased more than six months prior to the return date.
 - c. Any line item with an extended dealer net price of less than \$5.00.
 - d. Special order items.
 - e. Electrical components.
 - f. Paint, chemicals, and lubricants.
 - g. Decals and paper products.
 - h. Items purchased in kits.
- 7. The sender will be notified of any material received that is not acceptable.
- 8. Such material will be held for five working days from notification, pending instructions. If a reply is not received within five days, the material will be returned to the sender at his expense.
- Credit on returned parts will be issued at dealer net price at time of the original purchase, less a 15% restocking charge.
- 10. In cases where an item is accepted, for which the original purchase document can not be determined, the price will be based on the list price that was effective twelve months prior to the RMA date.
- 11. Credit issued will be applied to future purchases only.

PRICING AND REBATES

Prices are subject to change without prior notice. Price changes are effective on a specific date and all orders received on or after that date will be billed at the revised price. Rebates for price declines and added charges for price increases will not be made for stock on hand at the time of any price change.

Multiquip reserves the right to quote and sell direct to Government agencies, and to Original Equipment Manufacturer accounts who use our products as integral parts of their own products.

SPECIAL EXPEDITING SERVICE

A \$35.00 surcharge will be added to the invoice for special handling including bus shipments, insured parcel post or in cases where Multiquip must personally deliver the parts to the carrier.

LIMITATIONS OF SELLER'S LIABILITY

Multiquip shall not be liable hereunder for damages in excess of the purchase price of the item with respect to which damages are claimed, and in no event shall Multiquip be liable for loss of profit or good will or for any other special, consequential or incidental damages.

LIMITATION OF WARRANTIES

No warranties, express or implied, are made in connection with the sale of parts or trade accessories nor as to any engine not manufactured by Multiquip. Such warranties made in connection with the sale of new, complete units are made exclusively by a statement of warranty packaged with such units, and Multiquip neither assumes nor authorizes any person to assume for it any other obligation or liability whatever in connection with the sale of its products. Apart from such written statement of warranty, there are no warranties, express, implied or statutory, which extend beyond the description of the products on the face hereof.

Effective: February 22, 2006
